# STUDY OUTLINES FOR YOUR CLUBS

---

THESE outlines have been prepared especially for the use of study clubs and are so arranged as to form the basis of a year's program. The material is arranged under topics, or by question and answer, as seems best adapted to the subject; and in nearly every case lists of references are included. They can be adapted to any size of club or length of program.

These outlines are useful to the librarians who wish to help their club women in the arrangement of their programs and in the selection of reference material. They can be used by study clubs in connection with their printed programs and so save many dollars, as well as the labor of planning, preparing and printing private outlines.

# Have You All These Tools?

## BOOKS—OLD and NEW

Often you must know what books, if any, have been published on a certain subject, when, and by whom. Then you will appreciate the completeness and convenience of:

### **The United States Catalog Series**

Vol. I. U. S. Catalog, 3rd Edition, contains a record of every American book in print in the U. S. up to Jan. 1, 1912. Vol. II., the U. S. Catalog Supplement, just published, contains a record of books published 1912-1917 inclusive. These two volumes list about 249,000 books under author, title and as many subjects as the contents of the book requires.

### **The Cumulative Book Index**

This publication is issued monthly except August.

Not only are new books added, but any book, whatever its date of publication, which has changed its price or publisher, is cataloged again in the current number of the Index, with the author, title and subject entries, as thoroly as if it were a new book. These entries are distinguished by the addition of "corr. price" or "corr. pub." *Books announced for early publication are also cataloged.*

When you want to know whether or not a new book will meet with your requirements, consult:

### **The Book Review Digest**

It gives you a descriptive note and a collection of reviews taken from more than sixty literary, scientific and technical journals. It covers 200 books each month, on all subjects, from all publishers.

## PERIODICALS

You know that the current periodicals give you the best thoughts of the day, more quickly than the newest books—but you must know how to get this material. Hence these guides:

### **The Readers' Guide to Periodical Literature**

A monthly index to the contents of ninety of the most important American and English magazines—weeklies, fortnightly, monthlies and quarterlies.

### **Industrial Arts Index**

Issued ten times a year. Indexes about eighty of the best industrial journals in all lines of business, also the key to many U. S. bulletins dealing with industrial subjects.

### **Agricultural Index**

Issued ten times a year. It is a ready reference guide to the leading scientific and technical journals dealing with the art and practice of agriculture, horticulture, forestry, and including fruit culture, gardening, birds, bees, dairying and stock breeding.

It is also a key to the most popular farm journals, and the bulletins of the state and federal departments giving the latest scientific researches and discoveries.

### **Index to Legal Periodicals**

As its name implies, it is the key to the contents of about sixty leading American, Canadian and English journals on legal subjects. Issued quarterly.

### **Public Affairs Information Service**

A clearing house for information regarding the latest developments in present-day problems, whether municipal, state or federal. A weekly service, or bi-monthly cumulated service, according to your requirements.

We shall be pleased to send you samples and descriptive literature on any or all of these publications.
